Quivira Rd. and 159th St. Construction - Traffic Impacts

The second phase of the Quivira improvements project began on December 23, 2019 and includes the closure of the Quivira-175th Street intersection. This closure is necessary to construct a roundabout and waterline at 175th and Quivira. The City anticipates the intersection will be opened to traffic in the late spring of 2020.

Reconstruction of 159th Street from Pflumm to Quivira is also scheduled for 2020 and includes the construction of a roundabout at 159th and Pflumm. 159th Street between Quivira and Pflumm will be closed on February 17, 2020. Later, the intersection of 159th and Pflumm will be closed for approximately 75 days. More information on the closure of 159th and Pflumm will be provided at a later date. The 159th Street reconstruction is scheduled to be completed this fall.

The projects are partially funded with federal funding that includes schedule and project delivery requirements.

There will be some disruption to your daily commutes. The City has been working closely with the Blue Valley School district to minimize impacts. Please allow extra time in your schedule and plan accordingly for delays. The emergency services departments are aware of the projects and the impacts. Emergency services personnel have confidence with their navigation system to provide the shortest and fastest route to provide any services in a timely manner. City staff will continue to monitor traffic flow and attempt to balance the needs for construction with public safety. Thank you for your patience during these construction projects.

Information related to the school dropoff patterns can be found at the Blue Valley Southwest home page:
