Apply Mulch Control Netting after site preparation and seeding (if any). Anchor matting in an 8" trench, staked and banded, on top of slope. Extend mulch netting 3 ft past top & bottom of slope, and 2 ft at the sides of the mulched or seeded area. Mulch netting shall be pitched from top of slope to the bottom of slope and shall follow the direction of water flow.

FLOW

Overlap the sides of rolls at least 4".

FLOW

Provide at least a 2' overlap when the roll roll joins to a downward roll. The overlap should overlap the downward roll.

NOTE:
1. Mulch Control netting to be biodegradable with 2" by 2" mesh/band openings.
2. Extend netting beyond the edge of mulch area at least 1' at the sides and 2' at the top & bottom.
